## Summary

**Front-End Developer** with a passion for building clean, interactive web experiences using React and JavaScript. Currently studying Computer Science, I love turning ideas into reality through code and solving problems creatively. I'm excited to bring my energy, fresh perspective, and growing technical skills to a team where I can learn, contribute, and help create great user experiences.

## Skills

Frontend: HTML • CSS • JavaScript • React.js

Backend: Node.js • Express.js • MongoDB • MySQL

Languages: C++ • Java • Python

Frameworks: Bootstrap • Tailwind CSS

## Projects

### Daily Store

2024

I built a user-friendly online store using React for the front end and Node.js for the back end. I used Express.js to create RESTful APIs and MongoDB for storing data efficiently. I also added useful stuff like product search, shopping carts, and dashboards for admin. To make everything run smoother, I used caching and indexed the MongoDB, which helped with speeding up the queries.

### Weather App

2024

I built a weather app using React and the OpenWeatherMap API. It shows 5-day forecasts and has nice visuals thanks to some libraries I used. To make it load faster, I added localStorage for caching and made sure it handles errors well.

### To-do List App

2025

I created a Todo List app using React. You can add, delete, and mark tasks as complete, all thanks to React hooks. I also set it up so that it saves your tasks even after you close the app, which makes it way easier to use. And I made sure the design looks good on any device with some CSS for a nice responsive layout.

## Education

Ripah International University

Lahore, Pakistan

BSCS

10/2022

Fazaia Degree College

Shor kot Cantt, Pakistan

FSc Pre-Med

2021
